IPL Lumenis's Quantum SR Laser™

The Intense Pulse Light or IPL Lumenis's Quantum SR Laser(™) is used to treat a variety of skin conditions:

- Sun damage
- Age Spots (sun-induced freckles)
- Broken capillaries, rosecea - the red from vascular damage
- Telangiectasias
- Most benign brown pigments

The IPL Quantum SR Laser(™) produces a broad spectrum of light that generates remarkable results in treating these skin conditions using photo rejuvenation. It is safe enough to treat areas on the face, neck, chest, arms and legs.

The IPL is high powered and has fully adjustable pulse widths to treat the range of skin conditions that occur. For example, lighter pigmented lesions or age spots can be effectively treated using high peak power and short pulses; something that used to be untreatable with low powered pulsed light devices. IPL treatments are also very low risk and with no limitations on post-treatment activities.
